Did you know
indoor air
pollution is
more harmful
than outdoor
air pollution?

Indoor air pollution is the degradation of indoor air quality by harmful chemicals and other materials. It can be upto 10 times worse than outdoor air pollution. This is because contained areas enable potential pollutants to build up more than open spaces. Statistics suggest that in developing countries, health impacts of indoor air pollution far outweigh those of outdoor air pollution.*

Indoor
air pollution
can be upto
10 times
worse than outdoor
air pollution*

Did you know household air pollution can increase chances of harmful diseases?

Yes, polluted indoor air is one of the main reasons for people developing respiratory and other diseases.

Each year, close to 4 million people die prematurely from illness due to household air pollution.*

Household air pollution causes non-communicable diseases including stroke, ischaemic heart disease, chronic obstructive pulmonary disease (COPD) and lung cancer.*

Each
year close to
4 million

people die prematurely
from illness due to
household air pollution*

Did you know the causes of indoor air pollution?

The major proportion of our lives is spent indoors – and this has increased even further with the practice of work from home. What’s more, the more vulnerable segment of population like children, pregnant women, the elderly and the ailing spend more time indoors. To better understand the issue, let’s take a look at some of the causes of indoor air pollution.

Airborne Particles

Particulate Matter, Diesel Exhaust, Carbon Black, Dust, Smoke, Fibres, Plant Matter, Hair, Pollen

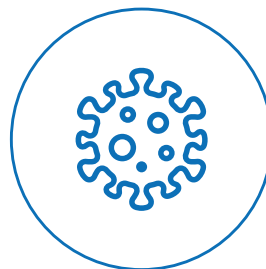

Volatile Organic Compounds (VOCs)

Paints, Glues & Varnishes, Wood Preservatives, Cleaning Supplies, Office Equipment, Furniture

Household Odours & Gases

Cooking Odours, Pet Smells, Cigarette Smoke, Chemicals, Sink or Drain Smells

Microbes

Bacteria, Mold, Yeasts and Mites

Introducing Modicare Cuckoo Air Purifier that removes upto 99.9%* airborne particles & allergens

Modicare Cuckoo Air Purifier makes sure that the air inside your home is as pure as nature.

3 stages of filtration + UV LED sterilization

For optimal air cleanliness

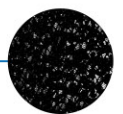

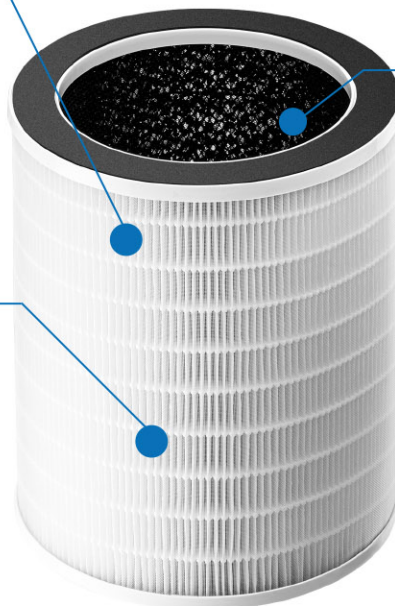

PRE FILTER

First stage of filtration that removes large sized particles such as dust, hair and fur

True HEPA Filter

Second stage of filtration that removes upto 99.9%* of airborne particles & allergens as small as 0.3 μm such as dust, smoke, mold, pollen and microbes

ACTIVE CARBON FILTER

Third stage of filtration that removes unpleasant odours & Volatile Organic Compounds (VOCs)

UV LED

UV LED produces UV-C type radiation which has deodorization and anti-bacterial properties

Certified by NABL approved lab

Some of the other exemplary features

CADR (Clean Air Delivery Rate) -329.23 m³/hr.

Our CADR or Clean Air Delivery Rate, with 329.23 m³/hr., is extremely efficient and effective at removing pollutants like pollen, smoke and dust from the indoors faster

Intuitive Control Panel

Set the machine at various modes like Auto Mode, Sleep Mode and Child Lock Mode. You can also set the timer (2hrs, 4hrs and 8 hrs) and control the fan speed of Modicare Cuckoo Air Purifier

3 Colours Air Quality Sensor

Indicates real time air quality with 3-coloured LED lighting, (Blue – Best Air Quality, Yellow – Normal Air Quality, Red – Poor Air Quality)

Filter Change Indicator

Alerts when filter needs to be changed. One filter lasts 3000 hours (upto 2 years)[^]

Portable

Easy to carry and move with built-in handle

Coverage Area

Suitable for spaces upto 550 sq.ft.

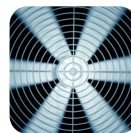

Easy to Change Filter

Remove back cover and change 3-in-1 filter

Child Lock

Switch on this mode to prevent unintended changes in the settings

3 Fan Speed

There are 3 fan speed options one can choose from - High, Moderate & Sleep

Auto Mode

Automatically adjusts the fan speed according to air quality

Timer

Control the run-time of the machine by setting the timer to 2 hours, 4 hours or 8 hours
